

EXPERIENCE

Hull Creek Construction

Emmett, Idaho

6/1992 - 2/1999

Framing Contractor

I worked with many of the finest building contractors in Southwestern Idaho obtaining various carpentry (timber, stick and steel) contracts for new home construction and residential remodeling.

Boise, Idaho

2/1999 - 7/2001

Project Manager

Prepared architectural drawings for jurisdictional review, bidding and construction. Participated in architectural survey of proposed remodels. Prepared meeting minutes and scope of work reports for client. Trained new employees in CADD standards and departmental operations. Performed surveys and feasibility studies of proposed sites for remodels, expansions and new store development. Interviewed jurisdictional authorities for compliance with planning and zoning, code issues and entitlement processes. Produced architectural contract drawings and specifications in a timely manner for Fortune 500 retail client. Participated in quality control meetings with various engineers in a team setting. Administration of AIA contract documents relating to bidding, submittals and change orders from design through construction. Communicated efficiently and effectively with contractors and site supervisors.

Boise, Idaho

7/2001 - 7/2004

Design Technician III

Implemented and maintained CADD/documentation standards for a new business venture with residential production builders. Developed templates and procedures for the first fully automated floor panelization facility in the US. Provided construction documentation assessments as they relate to jurisdictional and engineering review. Performed safety audits to verify safe working conditions on and off the job site. Researched and developed CADD/project management solutions for multiple business plans. Delivered important design and file transfer information for projects. Provided support to prototype division for manufacturing and marketing of new product development. Supplied structural material estimates to meticulously choreographed residential builds, including the framing plans for the 2003 and 2004 *Builder Magazine* Show Home and Pardee Homes 50-hour house. Traveled for the resolution of field issues, construction observations, time studies and product development. Travel also included strategic business meetings with national builders to cultivate a partnership in residential operations in an effort to stream-line business practices.
